

The dehydrator favors the Circular Economy

It's time to move from the recycling economy to the circular economy

The dehydrator is perfect for **zero-waste policies**.

ANCAREN with its dehydrators proposes a perfect tool to follow **Circular Economy policies**. The small amounts of dry and powdery waste that are obtained at the end of the cycle is a real resource that can be reused either as **bio-fertilizer to enrich soils** or as **biogas to make energy**. The circle is perfectly closed and circular.

Circular Economy

The dehydrator regenerates resources promoting the circular economy
